

LOUISIANA BIRD RECORDS COMMITTEE

REPORT FORM

This form is intended as a convenience in reporting observations of species on the Louisiana Bird Records Committee (LBRC) Review List. The LBRC recommends the use of this form or a similar format when submitting records for review to assure that all pertinent information is accounted for. Attach additional pages or files as necessary. Please print or type for hard copy. For electronic copy, be sure to save this file to your computer before entering text. Attach field notes, drawings, photographs, or tape recordings, if available. Include all photos for more obscurely marked species. When completed (if hard copy), mail to Secretary, Louisiana Bird Records Committee, c/o Museum of Natural Science, 119 Foster Hall, Louisiana State University, Baton Rouge, LA 70803-3216, or e-mail electronic copy as an attachment to Paul Edward Conover at <zoiseaux@lusfiber.net> .

1. English and Scientific names: Kelp Gull (*Larus dominicanus*)
2. Number of individuals, sexes, ages, general plumage (e.g., 2 in alternate plumage): one 2nd alternate.

3. Parish: St. Bernard

Specific Locality: Delta-Breton NWR, Chandeleur Islands, "Curlews," north Curlew Island sandbar (what's left/re-emerging following destruction of island by Hurricane Georges 28 September 1998).

4. Date(s) when observed: 7 September 1999

5. Time(s) of day when observed: survey period noon-2:00 PM

6. Reporting observer and city/state address

Reporting observer: Donna L. Dittmann and Steven W. Cardiff
City: 435 Pecan Drive
State: Louisiana

7. Other observers accompanying reporter who also *identified* the bird(s): Jim Graham, Refuge Biologist.

8. Other observers who independently identified the bird(s): none

9. Light conditions (position of bird in relation to shade and to direction and amount of light): weather? partly cloudy, seas calm

10. Optical equipment (type, power, condition): 10 X 40 Leica binoculars

11. Distance to bird(s): Closest enough to see bill coloration.

12. Duration of observation: Long enough to record basic details on plumage.

13. Habitat: barrier island

14. Behavior of bird / circumstances of observation (flying, feeding, resting; include and stress habits used in identification; relate events surrounding observation): seen from the boat as we were passing the sandbar; standing and in flight.

15. Description (include only what was actually seen, *not what "should" have been seen*; include if possible: total length/relative size compared to other familiar species; body bulk, shape, proportions; bill, eye, leg, and plumage characteristics. Stress features that separate it from similar species, *or for species that are known to hybridize frequently, stress features that help eliminate possible hybrids*): Herring Gull-sized gull; Mantle blackish-gray, notably darker than Laughing Gulls. The mantle had an almost black appearance and in certain light. The head and underparts were white. Tail was black with molt present. In flight the primaries were black and inner primaries were sheathed. The head looked fairly large in relationship to the rest of the body in flight, as did the legs and feet. The bill was adult-type, hefty with a pronounced gonydeal angle, deep yellow with a large red gonydeal patch. Legs and feet were greenish-yellow.

16. Voice: Not heard.

17. Similar species (include how they were eliminated by your observation): No other large black-backed gull shows this suite of characters in a sub-adult plumage. No hybrid combination shows these characters.

18. Photographs or tape recordings obtained? (by whom? attached?): None.

19. Previous experience with this species: Visited the Chandeluers in 1994 and saw the original pair of Kelps first discovered in 1989 by Dan Purrington and Larry O'Mealie. Saw Kelps on Chandeleurs during surveys with USFWS during 1997 and 1998. Due to age, this appears to be a 'new' individual not previously breeding before.

20. Identification aids: (list books, illustrations, other birders, etc. used in identification): None.

a. at time of observation: None.

b. after observation: None

21. This description is written from:

<input type="checkbox"/>	notes made during the observation.	Are notes attached?	Yes
X	notes made after the observation.	At what date?	
X	memory		

study of images

22. Are you positive of your identification? If not, explain: Yes.

23. Date: 21 February 2020 <compilation of Kelp records for LBRC>
Time:

24. May the LBRC have permission to display in whole or in part this report and accompanying photos on the LOS-LBRC website and LBRC Facebook page?

__yes_____

If yes, may we include your name with the report? __yes_____

Donna L. Dittmann and **Steven W. Cardiff**
