Louisiana Ornithological Society's

LOUISIANA BIRD RECORDS COMMITTEE

Rare Bird Report Form

This form is intended as a convenience in reporting observations of species on the Louisiana Bird Records Committee (LBRC) Review List. The LBRC recommends the use of this form or a similar format when submitting records for review (to ensure that all information involving an observation is accounted for). Attach additional pages as necessary. Please print or type. Attach fieldnotes, drawings, photographs, or tape recordings, if available. Include all photos for obscurely marked species. When completed, mail to Secretary, Louisiana Bird Records Committee, c/o Museum of Natural Science, 119 Foster Hall, Louisiana State University, Baton Rouge, LA 70803-3216.

	3216.
1. 19	English and Scientific names: Vaux's Swift (Chaetura vauxi)
2.	Number of individuals, age, sex, general plumage (e. g., "2 adult males in alternate treeding> plumage"): 7-&
3.	Locality: LOUISIANA; East Baton Rouge Par., Baton Rouge, (parish)
	Capitol Lake (parish)
	(specific locality)
4.	Date(s) when observed: 20 February 2006
5.	Time(s) of day when observed: ~ 11 am
6.	Reporting observer and address: Daniel Lane LSU Tuseum of Natural Science
	Baton Rouge, LA 70803
7.	Other observers accompanying reporter who also identified the bird(s):
8.	Other observers who independently identified the bird(s): Phred Benham, Justin and Devon Bosler
9.	Light conditions (position of bird in relation to shade and to direction and amount of light): Overcast sty. Birds largely backlit, but as they flum, they'd turn and swerre, sometimes below campy height, Optical equipment (type, power, condition): allowing me views of indepents and
10.	Optical equipment (type, power, condition): allowing me veens of inderports and
11.	Zeiss 10x40 binowlens rung. Distance to bird(s): 10-50 m
12.	Duration of observation:
	About 20 min

14.	Behavior of bird/circumstances of observation (flying, feeding, resting; include and stress habits used in identification; relate events surrounding the observation): Flying. I never no bired any other delived (dunking, achie foraging, etc.)
15.	Description (include only what was actually seen, not what "should" have been seen; if
	possible, give details on total length/relative size compared to other familiar species,
	body bulk, shape, proportions, bill, eye, leg, and plumage characteristics. Stress
	features that separate it from similar species. Attach additional pages as necessary):
	Small chaeters swifts with narrow crings, rapid wingbeats,
	and extensively pale underparts. Rungs looked paler than
	back. I wider primaries
	(aith buge or innermost primaries)
	(sometimes of an ill of the sex general plumage (g. an ill male in alternate
	Vaux's
	de de la contraction de la con
	(usined)
	(John Milliage)
16.	Voice: None heard (Benham reports to have heard their distinct
10.	vocalizations)
17.	
17.	Similar species (and how are they eliminated by your description?): Chimpey Swift is very similar, but has broade privaries, deviker
17. 18.	
	Similar species (and how are they eliminated by your description?): Chinney Swift is very similar, but has broadle privaries, deviker Photographs or tape recordings obtained? (by whom? attached?): None Previous experience with this species:
18.	Similar species (and how are they eliminated by your description?): Chinney Swift is very similar, but has broadle privaries, deviker Photographs or tape recordings obtained? (by whom? attached?): undeparts slower ming the None Previous experience with this species: Seen various times, including in Baton Rouse previously.
18.	Similar species (and how are they eliminated by your description?): Chinney Swift is very similar, but hers broadle primaries, deviker Photographs or tape recordings obtained? (by whom? attached?): Previous experience with this species: Seen various times, including in Baton Rouse previously. Identification aids: (list books, illustrations, other birders, etc. used in identification):
18. 19.	Similar species (and how are they eliminated by your description?): Chinney Swift is very similar, but has broadle privaries, deviker Photographs or tape recordings obtained? (by whom? attached?): undeparts slower ming the None Previous experience with this species: Seen various times, including in Baton Rouse previously.
18. 19.	Similar species (and how are they eliminated by your description?): Chinney Swift is very similar, but has broadle privaries, denker Photographs or tape recordings obtained? (by whom? attached?): None Previous experience with this species: Seen various times, including in Daton Rouse previously. Identification aids: (list books, illustrations, other birders, etc. used in identification): a. at time of observation:
18. 19.	Similar species (and how are they eliminated by your description?): Chinney Swift is very similar, but hers broadle primaries, deviker Photographs or tape recordings obtained? (by whom? attached?): Previous experience with this species: Seen various times, including in Baton Rouse previously. Identification aids: (list books, illustrations, other birders, etc. used in identification):
18. 19. 20.	Similar species (and how are they eliminated by your description?): Chinney Suift is very similar, but hers broadle privaries, dearker Photographs or tape recordings obtained? (by whom? attached?): None Previous experience with this species: Seen various times including in Baton Rouge previously. Identification aids: (list books, illustrations, other birders, etc. used in identification): a. at time of observation: b. after observation:
18. 19.	Similar species (and how are they eliminated by your description?): Chinney Suift is very similar, but has broadle privatives, dearker Photographs or tape recordings obtained? (by whom? attached?): None Previous experience with this species: Seen various times including in Daton Rouse previously. Identification aids: (list books, illustrations, other birders, etc. used in identification): a. at time of observation: b. after observation: This description is written from: X notes made during the observation; notes made
18. 19. 20.	Similar species (and how are they eliminated by your description?): Chinney Swift is very similar, but hers broadle privaries dearker Photographs or tape recordings obtained? (by whom? attached?): undepeads slower minster Previous experience with this species: Seen various times including in Daton Porse previously. Identification aids: (list books, illustrations, other birders, etc. used in identification): a. at time of observation: b. after observation: This description is written from: X notes made during the observation; notes made after the observation (date:); memory.
18. 19. 20.	Similar species (and how are they eliminated by your description?): Chinney Swift is very similar, but hers broadle privaries dearker Photographs or tape recordings obtained? (by whom? attached?): undepeads slower minster Previous experience with this species: Seen various times including in Daton Porse previously. Identification aids: (list books, illustrations, other birders, etc. used in identification): a. at time of observation: b. after observation: This description is written from: X notes made during the observation; notes made after the observation (date:); memory.
18. 19. 20. 21.	Similar species (and how are they eliminated by your description?): Chinney Swift is very similar, but hers broadle privaries dearker Photographs or tape recordings obtained? (by whom? attached?): undepeads slower minster Previous experience with this species: Seen various times including in Daton Porse previously. Identification aids: (list books, illustrations, other birders, etc. used in identification): a. at time of observation: b. after observation: This description is written from: X notes made during the observation; notes made after the observation (date:); memory.
18. 19. 20.	Similar species (and how are they eliminated by your description?): Chinney Swift is very similar, but hers broadle privaries dearker Photographs or tape recordings obtained? (by whom? attached?): undepeads slower minster Previous experience with this species: Seen various times including in Daton Porse previously. Identification aids: (list books, illustrations, other birders, etc. used in identification): a. at time of observation: b. after observation: This description is written from: X notes made during the observation; notes made after the observation (date:); memory.
18. 19. 20. 21.	Similar species (and how are they eliminated by your description?): Chinney Swift is very similar, but hers broadle privaries dearker Photographs or tape recordings obtained? (by whom? attached?): undepeads slower minster Previous experience with this species: Seen various times including in Daton Porse previously. Identification aids: (list books, illustrations, other birders, etc. used in identification): a. at time of observation: b. after observation: This description is written from: X notes made during the observation; notes made after the observation (date:); memory.
18. 19. 20. 21.	Similar species (and how are they eliminated by your description?): Chinney Suift is very similar, but has broadle privatives, dearker Photographs or tape recordings obtained? (by whom? attached?): None Previous experience with this species: Seen various times including in Daton Rouse previously. Identification aids: (list books, illustrations, other birders, etc. used in identification): a. at time of observation: b. after observation: This description is written from: X notes made during the observation; notes made
18. 19. 20. 21.	Similar species (and how are they eliminated by your description?): Chinney Swift is very similar, but hers broadle privaries dearker Photographs or tape recordings obtained? (by whom? attached?): undepeads slower minster Previous experience with this species: Seen various times including in Daton Porse previously. Identification aids: (list books, illustrations, other birders, etc. used in identification): a. at time of observation: b. after observation: This description is written from: X notes made during the observation; notes made after the observation (date:); memory.

13. Habitat: Lake-edge in urban neighborhood
