

Louisiana Ornithological Society's
LOUISIANA BIRD RECORDS COMMITTEE

Rare Bird Report Form

This form is intended as a convenience in reporting observations of species on the Louisiana Bird Records Committee (LBRC) Review List. The LBRC recommends the use of this form or a similar format when submitting records for review (to ensure that all information involving an observation is accounted for). Attach additional pages as necessary. Please print or type. Attach fieldnotes, drawings, photographs, or tape recordings, if available. Include all photos for obscurely marked species. When completed, mail to Secretary, Louisiana Bird Records Committee, c/o Museum of Natural Science, 119 Foster Hall, Louisiana State University, Baton Rouge, LA 70803-3216.

1. English and Scientific names: PAINTED REDSTART, *Myioborus pictus*
2. Number of individuals, age, sex, general plumage (e. g., "2 adult males in alternate <breeding> plumage"): 1 ADULT
3. Locality: LOUISIANA: CAMERON
(parish)
PARKING LOT, PEVETO WOODS SANCTUARY
(specific locality)
4. Date(s) when observed: 18 APRIL 2001
5. Time(s) of day when observed: ~ 8:30 & 10:15 AM (CDT)
6. Reporting observer and address:
JOSEPH P. KLEIMAN
15913 MALVERN HILL
BATON ROUGE, LA 70817
7. Other observers accompanying reporter who also identified the bird(s):
KAREN FAY
8. Other observers who independently identified the bird(s):
FOUND EARLIER IN WEEK BY R. BREEDLOVE - SEEN & FILMED BY MANY
9. Light conditions (position of bird in relation to shade and to direction and amount of light): CLEAR, SUNNY DAY, GOOD LIGHT
10. Optical equipment (type, power, condition):
ZEISS 10X40, GOOD
11. Distance to bird(s):
5 FEET & 10 TO 15 FEET
12. Duration of observation:
0.5 MIN. FIRST TIME (BIRD DRINKING FROM A PUDDLE AT MY FEET
~ 3.0 MIN. SECOND TIME

13. Habitat: PARKING LOT WITH TREES & SHRUBS

14. Behavior of bird/circumstances of observation (flying, feeding, resting; include and stress habits used in identification; relate events surrounding the observation):

15. Description (include only what was actually seen, not what "should" have been seen; if in lot possible, give details on total length/relative size compared to other familiar species, body bulk, shape, proportions, bill, eye, leg, and plumage characteristics. Stress features that separate it from similar species. Attach additional pages as necessary):
 1ST TIME BIRD WAS DRINKING, AND TIME ACTIVELY FEEDING IN LOT
 TYPICAL WARBLER SIZE, FEATHERS A BIT LARGER
 BLACK ABOVE, WITH BLACK HEAD AND THROAT
 STRIKING WHITE WING PATCH, RED BREAST AND
 BELLY - SMALL, POINTED BLACK BILL
 UPPER TAIL BLACK WITH WHITE OUTER TAIL FEATHERS
 UNDER TAIL WHITE

16. Voice: DIDN'T HEAR

17. Similar species (and how are they eliminated by your description?):

NO REGULAR N. Am. WARBLER LOOKS LIKE THIS
 PHOTOGRAPHS OR TAPE RECORDINGS OBTAINED? (by whom? attached?):
 ONE SLIDE ATTACHED

19. Previous experience with this species:

SEEN SEVERAL TIMES IN ARIZONA, ONCE IN TX & LA

20. Identification aids: (list books, illustrations, other birders, etc. used in identification):

a. at time of observation:

b. after observation: NONE

21. This description is written from: notes made during the observation; notes made after the observation (date:); memory. & PHOTO

22. Are you positive of your identification (if not, then explain)? YES

23. Signature of reporter: Joseph P. Korman 5/14/01 (date)

Rare Bird Report Form

This form is intended as a convenience in reporting observations of species on the Louisiana Bird Records Committee (LBRC) Review List. The LBRC recommends the use of this form or a similar format when submitting records for review (to ensure that all information involving an observation is accounted for). Attach additional pages as necessary. Please print or type. Attach fieldnotes, drawings, photographs, or tape recordings, if available. Include all photos for obscurely marked species. When completed, mail to Secretary, Louisiana Bird Records Committee, c/o Museum of Natural Science, 119 Foster Hall, Louisiana State University, Baton Rouge, LA 70803-3216.

1. English and Scientific names: Painted Redstart
(Myioborus pictus)
2. Number of individuals, age, sex, general plumage (e. g., "2 adult males in alternate <breeding> plumage"): one adult
3. Locality: LOUISIANA: Cameron Par.; Peveto Woods
(parish)

(specific locality)
4. Date(s) when observed: 18 April 2001
5. Time(s) of day when observed: 10AM - 1 pm
6. Reporting observer and address: Daniel F. Lane
LSU Museum of Natural Sci.
7. Other observers accompanying reporter who also identified the bird(s):
Lang Stevenson, m. obs.
8. Other observers who independently identified the bird(s):
Roger Breedlove, Mark Swan, m. obs.
9. Light conditions (position of bird in relation to shade and to direction and amount of light):
Under canopy and in open sunlight
10. Optical equipment (type, power, condition):
Zeiss 10x40 binoculars
11. Distance to bird(s):
As close as 6 feet
12. Duration of observation:
About 20 min total

13. Habitat: Live Oak/Hackberry checker

14. Behavior of bird/circumstances of observation (flying, feeding, resting; include and stress habits used in identification; relate events surrounding the observation):

15. Description (include only what was actually seen, not what "should" have been seen; if possible, give details on total length/relative size compared to other familiar species, body bulk, shape, proportions, bill, eye, leg, and plumage characteristics. Stress features that separate it from similar species. Attach additional pages as necessary):

Mid-sized warbler; black upperparts; white crescent under eye; white greater coverts, terminal edges, vent (with black tips to vent feathers), outer tail feathers; scarlet center of belly.

16. Voice: A 3-4 note "cheery cheery cheery" (typical song)

17. Similar species (and how are they eliminated by your description?): None

18. Photographs or tape recordings obtained? (by whom? attached?): see attached photos (by lane)

19. Previous experience with this species: Various times in AZ, Mexico.

20. Identification aids: (list books, illustrations, other birders, etc. used in identification): a. at time of observation: none b. after observation: none

21. This description is written from: notes made during the observation; notes made after the observation (date:); X memory.

22. Are you positive of your identification (if not, then explain?): Yes

23. Signature of reporter: David M. (date) 20 Apr 1991

Report Form

This form is intended as a convenience in reporting observations of species on the Louisiana Bird Records Committee (LBRC) Review List. The LBRC recommends the use of this form or a similar format when submitting records for review (to assure that all pertinent information is accounted for). Attach additional pages as necessary. Please print or type. Attach xerox of field notes, drawings, photographs, or tape recordings, if available. Include all photos for more obscurely marked species. When completed, mail to Secretary, Louisiana Bird Records Committee, c/o Museum of Natural Science, 119 Foster Hall, Louisiana State University, Baton Rouge, LA 70803-3216.

1. English and Scientific names: Painted Redstart
Myioborus pictus
2. Number of individuals, sexes, ages, general plumage (e.g., 2 in alternate plumage): 1, unsure of age or sex
3. Locality: LOUISIANA: Cameron
(parish)
Holleyman
(specific locality)
4. Date(s) when observed: Monday, April 16, 2001
5. Time(s) of day when observed: 3:00 P.
6. Reporting observer and address: Roger J. Breedlove
152 Alice Dr.
Pineville, LA 71360
7. Other observers accompanying reporter who also identified the bird(s):
Barbara Breedlove
(same address)
8. Other observers who independently identified the bird(s):
Ed Gaultreaux (later on the 16th), Jon Dunn,
Charlie Lyon + Mark Swan on the 17th
9. Light conditions (position of bird in relation to shade and to direction and amount of light): At times in sunlight, but generally in the shade.
10. Optical equipment (type, power, condition): Leica 8x42 ultra (exc.)
11. Distance to bird(s): 15 ft. to 40 ft.
12. Duration of observation: Off and on for 2 hours
13. Habitat: Trees + shrubs

14. Behavior of bird / circumstances of observation (flying, feeding, resting; include and stress habits used in identification; relate events surrounding observation):
foraging - preening, etc.

15. Description (include only what was actually seen, not what "should" have been seen; include if possible: total length/relative size compared to other familiar species, body bulk, shape, proportions, bill, eye, leg, and plumage characteristics. Stress features that separate it from similar species): obvious warbler - black above and on throat. Red breast. white in outer tail feathers, wings, belly and down part vent - dark legs.

16.

Voice: N/A

17.

Similar species (include how they were eliminated by your observation): N/A

18.

Photographs or tape recordings obtained? (by whom? attached?) (disc) or

19.

Previous experience with this species: seen often in 5th Arizona

20. Identification aids: (list books, illustrations, other birders, etc. used in identification):

b. after observation:

a. at time of observation:

21.

This description is written from: notes made during the observation (notes attached?): notes made after the observation (date:) memory.

22.

Are you positive of your identification? If not, explain: Yes

23.
