LOUISIANA BIRD RECORDS COMMITTEE

REPORT FORM

- 1. English and Scientific names: Ringed kingfisher
- 2. Number of individuals, sexes, ages, general plumage (e.g., 2 in alternate plumage): One
- 3. Parish: St Martin

Specific Locality: Lake Martin (Lake la P)ointe) Cypress Island Preserve

- 4. Date(s) when observed: 2/14/2015
- 5. Time(s) of day when observed: 11:15 to 11:30 AM
- 6. Reporting observer and address: Janine Robin 13083 Blackwell Lane, Franklinton, LA 70438
- 7. Other observers accompanying reporter who also *identified* the bird(s): Mary Mehaffey and Susan Epps.
- 8. Other observers who independently identified the bird(s): Charlie Lyons, Dave Patton, Jeff Trahan, Glenn Ousset, Michael Plauche and Warren Preble. Others there, but didn't get their names.
- 9. Light conditions (position of bird in relation to shade and to direction and amount of light): Bird in the shade of the cypress trees and moss. Was backlit also. But still were able to see the bird clearly and make out it's colors and body shape.
- 10. Optical equipment (type, power, condition): Steiner binoculars 8x42. Also observed through Mehaffey's Bruner 60x scope and Charlie Lyons scope.
- 11. Distance to bird(s): 100 to 150 feet
- 12. Duration of observation: 15 minutes
- 13. Habitat: Lake Martin. Large cypress trees standing in water with huge amounts of moss hanging from the limbs.
- 14. Behavior of bird / circumstances of observation (flying, feeding, resting; include and stress habits used in identification; relate events surrounding observation): Saw the bird fly in low through the trees when flushed by a slow moving boat. It was also vocal at that time. It perched on a limb and stayed in that spot for about 15 minutes. It did some

preening also.

- 15. Description (include only what was actually seen, *not what "should" have been seen;* include if possible: total length/relative size compared to other familiar species; body bulk, shape, proportions; bill, eye, leg, and plumage characteristics. Stress features that separate it from similar species, *or for species that are known to hybridize frequently, stress features that help eliminate possible hybrids*):It's wing span was wider than a Belted kingfisher and was visibly a larger bird. Had to head that looked larger in proportion to it's body which is very kingfisher-like. The bill was very large. Blue/gray head and back. White ring around neck, blue/gray breast, white band, then a rufous belly.
- 16. Voice: Very loud rat-tat-tat rattle. Similar to Belted but not as hurried.
- 17. Similar species (include how they were eliminated by your observation): Larger than the Belted kingfisher. Voice louder. Colors similar, but a different pattern.
- 18. Photographs or tape recordings obtained? (by whom? attached?): no
- 19. Previous experience with this species: Seen several while in Costa Rica. Also seen in South Texas.
- 20. Identification aids: (list books, illustrations, other birders, etc. used in identification):
- a. at time of observation: Other birders who put us on the area to watch.

b. after observation: Verified species and sex of bird in Sibley field guide and Natl. Geo of North America field guide.

21. This description is written from:

	notes made during the observation.	Are notes attached?	
	notes made after the observation.	At what date?	
X	memory		
	study of images		

22. Are you positive of your identification? If not, explain: yes

23. Date: 2/27/2015 Time:7:38pm
