

# LOUISIANA BIRD RECORDS COMMITTEE

## REPORT FORM

This form is intended as a convenience in reporting observations of species on the Louisiana Bird Records Committee (LBRC) Review List. The LBRC recommends the use of this form or a similar format when submitting records for review to assure that all pertinent information is accounted for. Attach additional pages or files as necessary. Please print or type for hard copy. For electronic copy, be sure to save this file to your computer before entering text. Attach field notes, drawings, photographs, or tape recordings, if available. Include all photos for more obscurely marked species. When completed (if hard copy), mail to Secretary, Louisiana Bird Records Committee, c/o Museum of Natural Science, 119 Foster Hall, Louisiana State University, Baton Rouge, LA 70803-3216, or e-mail electronic copy as an attachment to Paul Edward Conover at <

- English and Scientific names: Townsend's Solitaire - Myadestes townsendi
- Number of individuals, sexes, ages, general plumage (e.g., 2 in alternate plumage): 1 bird, sex/age unknown, Basic
- Parish: Cameron  
Specific Locality: Willow Island, private property off LeBlanc camp Rd (open to birds)
- Date(s) when observed: 5-6-21
- Time(s) of day when observed: 4:25 PM
- Reporting observer and city/state address  
Reporting observer: Charlotte Chetobery, 6513 San Miguel St., Lake Charles, LA
- Other observers accompanying reporter who also identified the bird(s): Was birding alone
- Other observers who independently identified the bird(s): two other birders came over and helped with identification
- Light conditions (position of bird in relation to shade and to direction and amount of light): was able to observe in shade and good light
- Optical equipment (type, power, condition): Fluor-Nikon 10x42, camera Nikon P1000-24-300mm zoom and 60000KVM
- Distance to bird(s): 40-50 ft
- Duration of observation: 1.5 hours
- Habitat: oak chenier
- Behavior of bird / circumstances of observation (flying, feeding, resting; include and observed balloping to ground and stress habits used in identification; relate events surrounding observation): back to low canopy feeding
- Description (include only what was actually seen, not what "should" have been seen overall gray bird, the size of bulk, shape, proportions; bill, eye, leg, and plumage characteristics. Stress features that separate it from similar species, or for species that are known to hybridize frequently; stress features that help eliminate possible hybrids): body a mockingbird, white eye ring, small bill, and brown wing patch
- Voice: N/A
- Similar species (include how they were eliminated by your observation): Northern Mockingbird - TDSO doesn't have white wing patch, C. Chetobery
- Photographs or tape recordings obtained? (by whom? attached?): YES
- Previous experience with this species: N/A
- Identification aids (list books, illustrations, other birders, etc. used in identification): bird app + other birders
- a. at time of observation: 4:25 PM
- b. after observation:
- This description is written from:
 

notes made during the observation	Are notes attached?
notes made after the observation	At what date?
memory	
study of images	
- Are you positive of your identification? If not, explain: YES
- Date: 5-20-21  
Time: 5:25 PM
- May the LBRC have permission to display in whole or in part this report and accompanying photos on the LOS-LBRC website and LBRC Facebook page?  
YES
